LIGHTYEAR

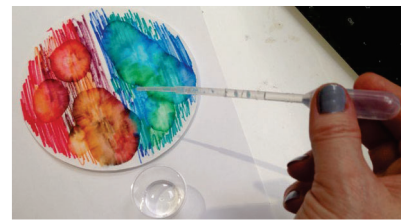

Design an exoplanet

INSTRUCTIONS

1. How will your planet look? Red like Mars, or blue like Neptune? Does it have a polar ice cap? Be creative!
1. Write your name on a piece of filter paper in pencil. Colour your 'planet' using felt tips.
1. Use the pipette to drip water onto the paper to mix and merge the colours.
1. Put your planet onto the rack to dry - don't forget to collect it before you go!

CHALLENGE

Can you make a storm on the surface of your planet like Jupiter's great red spot?
